-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status of Application

This application was allowed on March 3, 2005, however an error was subsequently discovered and the application was withdrawn from issue on April 19, 2005. The prior Office Action, mailed March 3, 2005 and allowing claims 1-14 is vacated. Any inconvenience on the part of applicant is regretted. An Office Action on all of the claims follows.

Claims Allowed

Claims 1-15 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the invention of a hand lever having a housing with an exterior, a horn controller adapted to be connected to a horn, the horn controller being coupled to the housing an accessible from the exterior thereof, and wherein the hand lever is adapted to control at least one of an engine throttle and a transmission shift position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims Rejected

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3681

Claims 16, 17, and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Teeter '900. Teeter shows a control lever with cruise control switches 12 and 14 within thumb's reach when the palm of the hand is placed on the distal end of the lever.

Claims 16-19 and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Potis '578. Potis shows an engine speed controller 40 within thumb's reach when the hand is placed on the distal end of the lever housing, and also shows a wire 144 extending through a hollow portion of the housing to an electronic controller.

Claim Objected

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not anticipate nor render obvious the invention as recited in claim 17 with the additional feature of a hub shaft for rationally coupling the hand lever to a hand lever support, and wherein the wiring is wrapped around the hub shaft.

Prior Art Discussed

The references cited by the examiner are deemed pertinent to applicant's disclosure. Teeter '900 shows a transmission control lever with engine controls thereon, but no horn controller is shown. Lauer '586 likewise shows a lever with transmission and engine controls but no horn is shown. Gualtieri '001 shows another transmission control lever with other controls thereon, but not a horn controller. Prince '516 shows a single lever control for a boat with a horn 50, but no horn controller is shown.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 571-272-7098. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
